INDEPENDENT AUDITORS' REPORT TO THE SHAREHOLDERS Gulf International Bank B.S.C.

12 February 2011

Manama, Kingdom of Bahrain

Report on the consolidated financial statements

We have audited the accompanying consolidated financial statements of Gulf International Bank B.S.C. ("the Bank") and its subsidiaries (together the "Group"), which comprise the consolidated statement of financial position as at 31 December 2010, and the consolidated statements of income, comprehensive income, changes in equity and cash flows for the year then ended, and notes, comprising a summary of significant accounting policies and other explanatory information.

Responsibility of the board of directors for the consolidated financial statements

The board of directors of the Bank is responsible for the preparation and fair presentation of these consolidated financial statements in accordance with International Financial Reporting Standards, and for such internal control as the board of directors determines is necessary to enable the preparation of the consolidated financial statements that are free from material misstatements, whether due to fraud or error.

Auditors' responsibility

Our responsibility is to express an opinion on these consolidated financial statements based on our audit. We conducted our audit in accordance with International Standards on Auditing. Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the consolidated financial statements. The procedures selected depend on our judgment, including the assessment of the risks of material misstatement of the consolidated financial statements, whether due to fraud or error. In making those risk assessments, we consider internal control relevant to the entity's preparation and fair presentation of the consolidated financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting principles used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the consolidated financial statements present fairly, in all material respects, the consolidated financial position of the Group as at 31 December 2010, and its consolidated financial performance and its consolidated cash flows for the year then ended in accordance with International Financial Reporting Standards.

Report on other regulatory requirements

As required by the Bahrain Commercial Companies Law and the Central Bank of Bahrain Law, we report that the Bank has maintained proper accounting records and the consolidated financial statements are in agreement therewith; the financial information contained in the chairman's statement is consistent with the consolidated financial statements; we are not aware of any violations of the Bahrain Commercial Companies Law, the Central Bank of Bahrain Law, the terms of the Bank's license or the terms of the Bank's memorandum and articles of association having occurred during the year that might have had a material adverse effect on the business of the Bank or on its financial position; and satisfactory explanations and information have been provided to us by the management in response to all our requests.

1. INCORPORATION AND REGISTRATION

The parent company of the Group (the Group), Gulf International Bank B.S.C. (the Bank), is a Bahraini Shareholding Company incorporated in the Kingdom of Bahrain by Amiri Decree Law No.30 dated 24th November 1975 and is registered as a conventional wholesale bank with the Central Bank of Bahrain. The registered office of the Bank is located at Al-Dowali Building, 3 Palace Avenue, Manama, Kingdom of Bahrain.

The Group is principally engaged in the provision of wholesale commercial and investment banking services. The Group operates through subsidiaries, branch offices and representative offices located in six countries worldwide. The total number of staff employed by the Group at the end of the financial year was 440.

2. ACCOUNTING POLICIES

The principal accounting policies adopted in the preparation of the consolidated financial statements are set out below:-

2.1 Basis of preparation

The consolidated financial statements have been prepared in accordance with International Financial Reporting Standards and in conformity with the Bahrain Commercial Companies Law and the Central Bank of Bahrain and Financial Institutions Law. The consolidated financial statements have been prepared under the historical cost convention as modified by the revaluation of trading securities, available-for-sale securities and derivative financial instruments as explained in more detail in the following accounting policies. Recognised assets and liabilities that are hedged by derivative financial instruments are also stated at fair value in respect of the risk that is being hedged. The accounting policies have been consistently applied by the Bank and its subsidiaries and are consistent with those of the previous year.

2.2 Consolidation principles

The consolidated financial statements include the accounts of Gulf International Bank B.S.C. and its subsidiaries. Subsidiary undertakings are companies and other entities, including special purpose entities, in which the Bank holds, directly or indirectly, more than one half of the voting rights, or otherwise has the power to exercise effective control over the financial and operating policies of the entity. All intercompany balances and transactions, including unrealised gains and losses on transactions between Group companies, have been eliminated.

2.3 Foreign currencies

Items included in the consolidated financial statements of the Bank and its principal subsidiaries are measured based on the currency of the primary environment in which the entity operates (the functional currency). The consolidated financial statements are presented in US Dollars, representing the Bank's functional and presentation currency. Transactions in foreign currencies are converted to US Dollars at the rate of exchange prevailing at the date of the transaction. Monetary assets and liabilities denominated in foreign currencies are translated into US Dollars at market rates of exchange prevailing at the balance sheet date. Realised and unrealised foreign exchange gains and losses are included in trading income.

2.4 Financial assets and liabilities

Financial assets and liabilities comprise all assets and liabilities reflected in the statement of financial position, although excluding investments in subsidiaries, associated companies and joint ventures, employee benefit plans, property and equipment, deferred taxation and taxation payable.

a) Initial recognition and measurement

Financial assets are classified at inception into one of the following three categories:-

- · held-for-trading
- · loans and receivables
- · available-for-sale financial assets

Financial assets, other than those held-for-trading, are initially recognised at fair value, including transaction costs that are directly attributable to the acquisition of the financial asset.

Financial liabilities are initially recognised at fair value, representing the proceeds received net of premiums, discounts and transaction costs that are directly attributable to the financial liability.

All regular way purchases and sales of financial assets and liabilities held-for-trading are recognised on the trade date, i.e. the date on which the Group commits to purchase or sell the financial asset or liability. All regular way purchases and sales of other financial assets and liabilities are recognised on the settlement date, i.e. the date on which the asset or liability is received from or delivered to the counterparty. Regular way purchases or sales are purchases or sales of financial assets that require delivery within the time frame generally established by regulation or convention in the market place.

2. ACCOUNTING POLICIES (continued)

2.4 Financial assets and liabilities (continued)

b) Subsequent measurement

Subsequent to initial measurement, financial assets and liabilities are measured at either fair value or amortised cost, depending on their classification:-

Held-for-trading

Held-for-trading financial assets and liabilities are assets or liabilities acquired or incurred for the purpose of generating a profit from short-term fluctuations in price or are included in a portfolio in which a pattern of short-term profit taking exists.

Held-for-trading financial assets and liabilities are measured at fair value. The fair value for financial assets and liabilities traded in active markets is based on quoted prices, including quotations obtained from lead managers, brokers and dealers. The bid price is used to measure financial assets and the offer price is used to measure financial liabilities. Mid-market prices are used to measure fair value only to the extent that the Group has financial assets and liabilities with offsetting risk positions.

Realised and unrealised gains and losses, interest earned or incurred, and dividends received on held-for-trading financial assets and liabilities are included in trading income.

Loans and receivables

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market, other than those classified as held-for-trading. The majority of the Group's loans and receivables are included in the loans and advances category.

Financial assets classified as loans and receivables are stated at amortised cost using the effective interest rate method as described in note 2.7(a), less provision for impairment, with interest revenue recognised in the consolidated statement of income.

Available-for-sale financial assets

Available-for-sale financial assets are assets which are intended to be held for an indefinite period of time and may be sold in response to needs for liquidity, changes in interest rates, or concerns with respect to credit deterioration. Available-for-sale financial assets are measured at fair value. The fair value for available-for-sale financial assets in active markets is based on quoted prices, including quotations obtained from lead managers, brokers and dealers. The fair value for available-for-sale financial assets in inactive markets is determined using appropriate valuation techniques. Valuation techniques include comparison to similar instruments for which there are observable prices, and discounted cash flow techniques. Unquoted and illiquid equity investments for which fair values cannot be reliably measured are stated at cost less provision for impairment.

Unrealised gains and losses arising from changes in the fair values of available-for-sale financial assets are recognised in other comprehensive income. The cumulative fair value adjustments on available-for-sale financial assets which are sold or otherwise disposed or become impaired, and which had previously been recognised in other comprehensive income are transferred to the consolidated statement of income.

Non-trading financial liabilities

All financial liabilities, other than those designated as held-for-trading, are classified as non-trading financial liabilities and are measured at amortised cost using the effective interest rate method as described in note 2.7(a).

c) Derecognition of financial assets and liabilities

Financial assets are derecognised and removed from the consolidated statement of financial position when the right to receive cash flows from the assets has expired; the Group has transferred its contractual right to receive the cash flows from the assets, and substantially all the risks and rewards of ownership; or where control is not retained. Financial liabilities are derecognised and removed from the consolidated statement of financial position when the obligation is discharged, cancelled, or expires.

2. ACCOUNTING POLICIES (continued)

2.5 Impairment of financial assets

A provision for impairment is established where there is objective evidence that the Group will not collect all amounts due, including both principal and interest, in accordance with the contractual terms of the credit facility. Objective evidence that a financial asset is impaired may include a breach of contract, such as default or delinquency in interest or principal payments, the granting of a concession that, for economic or legal reasons relating to the borrower's financial difficulties, that would not otherwise be considered, indications that it is probable that the borrower will enter bankruptcy or other financial reorganisation, the disappearance of an active market, or other observable data relating to a group of assets such as adverse changes in the payment status of borrowers or issuers in the group, or economic conditions that correlate with defaults in the group. For equity securities classified as available-for-sale, a significant or prolonged decline in fair value below cost is considered in determining whether a security is impaired. Where such evidence exists, the cumulative net loss that has been previously recognised in other comprehensive income is transferred to the consolidated statement of income. The amount of the cumulative loss that is removed from other comprehensive income and recognised in the consolidated statement of income is the difference between the acquisition cost and current fair value, less any impairment loss on that security previously recognised in the consolidated statement of income.

With the exception of provisions for the impairment of available-for-sale financial assets, provisions for impairment are determined based on the difference between the net carrying amount and the recoverable amount of the financial asset. The recoverable amount is measured as the present value of expected future cash flows, including amounts recoverable from guarantees and collateral, discounted based on the interest rate at the inception of the credit facility or, for debt instruments remeasured to fair value, at the current market rate of interest for a similar financial asset. Provisions for the impairment of available-for-sale financial assets are determined based on the difference between the acquisition cost, net of principal repayments and amortisation adjustments, and the fair value of the financial asset, less any impairment loss previously recognised in the consolidated statement of income. Cumulative losses previously recognised in other comprehensive income, are reclassified from the available-for-sale securities revaluation reserve in equity to the consolidated statement of income.

Provisions for impairment are also measured and recognised on a collective basis in respect of impairments that exist at the balance sheet date but which will only be individually identified in the future. Future cash flows for financial assets that are collectively assessed for impairment are estimated based on contractual cash flows and historical loss experiences for assets with similar credit risk characteristics. Historical loss experience is adjusted, based on current observable data, to reflect the effects of current conditions that did not affect the period on which the historical loss experience is based.

Provisions for impairment are recognised in the consolidated statement of income and are reflected in an allowance account against loans and advances and investment securities.

Financial assets are written off after all restructuring and collection activities have taken place and the possibility of further recovery is considered to be remote. Subsequent recoveries are included in other income.

With the exception of provisions for the impairment of available-for-sale equity investments, provisions for impairment are released and transferred to the consolidated statement of income where a subsequent increase in the recoverable amount is related objectively to an event occurring after the provision for impairment was established. Impairment provisions for available-for-sale equity investments are only released and transferred to the consolidated statement of income on the redemption or sale of the investment.

Financial assets which have been renegotiated are no longer considered to be past due and are replaced on performing status when all principal and interest payments are up to date and future payments are reasonably assured. Financial assets subject to individual impairment assessment and whose terms have been renegotiated, are subject to ongoing review to determine whether they remain impaired or should be considered past due.

2.6 Offsetting financial assets and liabilities

Financial assets and financial liabilities are only offset and the net amount reported in the consolidated statement of financial position when there is a legally enforceable right to set off the recognised amounts and there is an intention to settle on a net basis, or to realise the asset and settle the liability simultaneously.

2. ACCOUNTING POLICIES (continued)

2.7 Revenue recognition

a) Interest income and interest expense

Interest income and interest expense for all interest-bearing financial assets and liabilities except those classified as held-for-trading are recognised using the effective interest rate method. The effective interest rate method is a method of calculating the amortised cost of a financial asset or liability and of allocating the interest income or interest expense over the expected life of the asset or liability. The effective interest rate is the rate that exactly discounts estimated future cash flows through the expected life of the financial asset or liability or, where appropriate, a shorter period, to the net carrying amount of the financial asset or liability. The application of the effective interest rate method has the effect of recognising interest income and interest expense evenly in proportion to the amount outstanding over the period to maturity or repayment. In calculating the effective interest rate, cash flows are estimated taking into consideration all contractual terms of the financial asset or liability but excluding future credit losses. Fees, including loan origination fees and early redemption fees, are included in the calculation of the effective interest rate to the extent that they are considered to be an integral part of the effective interest rate.

Interest income is suspended when either interest or principal on a credit facility is overdue by more than 90 days whereupon all unpaid and accrued interest is reversed from income. Interest on non-accrual facilities is included in income only when received. Credit facilities are restored to accrual status only after all delinquent interest and principal payments have been brought current and future payments are reasonably assured.

b) Fees and commissions

Fees and commissions that are integral to the effective interest rate of a financial asset or liability are included in the calculation of the effective interest rate.

Other fees and commissions are recognised as the related services are performed or received, and are included in fee and commission income.

c) Net trading income

Trading income arises from earnings generated from customer business and market making, and from changes in fair value resulting from movements in interest and exchange rates, equity prices and other market variables. Changes in fair value and gains and losses arising on the purchase and sale of net trading instruments are included in net trading income, together with the related interest income, interest expense and dividend income.

d) Dividend income

Dividend income is recognised as follows:-

- dividends from equity instruments classified as held-for-trading are recognised when the right to receive the dividend is established and are included in net trading income.
- dividends from equity instruments classified as available-for-sale are recognised when the right to receive the dividend is established and are included in other income.
- in the separate financial statements of the Bank, dividends from subsidiaries are recognised when received.

2.8 Securities financing arrangements

Securities purchased under agreements to resell (reverse repurchase agreements) and securities sold under agreements to repurchase (repurchase agreements) are treated as collateralised lending and borrowing transactions and are recorded in the consolidated statement of financial position at the amounts the securities were initially acquired or sold. Interest earned on reverse repurchase agreements and interest incurred on repurchase agreements are included in interest income and interest expense respectively. Securities purchased under agreements to resell are included in cash and other liquid assets.

2.9 Premises and equipment

Land is stated at cost. Other premises and equipment are stated at cost less accumulated depreciation. The residual values and useful lives of premises and equipment are reviewed at each balance sheet date, and adjusted where appropriate. Where the carrying amount of premises or equipment is greater than the estimated recoverable amount, the carrying amount is reduced to the recoverable amount.

Generally, costs associated with the maintenance of existing computer software are recognised as an expense when incurred. However, expenditure that enhances and extends the benefits of computer software programs beyond their original specifications and lives is recognised as a capital improvement and capitalised as part of the original cost of the software.

2. ACCOUNTING POLICIES (continued)

2.10 Other provisions

Other provisions are recognised when the Group has a present legal or constructive obligation as a result of a past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation, and a reliable estimate can be made of the amount of the obligation.

2.11 Derivative financial instruments and hedge accounting

Derivative financial instruments are contracts, the value of which is derived from one or more underlying financial instruments or indices, and include futures, forwards, swaps and options in the interest rate, foreign exchange, equity and credit markets.

Derivative financial instruments are recognised in the consolidated statement of financial position at fair value. Fair values are derived from prevailing market prices, discounted cash flow models or option pricing models as appropriate. In the consolidated statement of financial position, derivative financial instruments with positive fair values (unrealised gains) are included in other assets and derivative financial instruments with negative fair values (unrealised losses) are included in other liabilities.

The changes in the fair values of derivative financial instruments entered into for trading purposes or to hedge other trading positions are included in net trading income.

The recognition of changes in the fair values of derivative financial instruments entered into for hedging purposes is determined by the nature of the hedging relationship. For the purposes of hedge accounting, derivative financial instruments are designated as a hedge of either: (i) the fair value of a recognised asset or liability (fair value hedge), or (ii) the future cash flows attributable to a recognised asset or liability or a firm commitment (cash flow hedge).

The Group's criteria for a derivative financial instrument to be accounted for as a hedge include:-

- the hedging instrument, the related hedged item, the nature of the risk being hedged, and the risk management objective and strategy must be formally documented at the inception of the hedge,
- it must be clearly demonstrated that the hedge is expected to be highly effective in offsetting the changes in fair values or cash flows attributable to the hedged risk in the hedged item,
- the effectiveness of the hedge must be capable of being reliably measured, and
- the hedge must be assessed on an ongoing basis and determined to have actually been highly effective throughout the financial reporting period.

Changes in the fair values of derivative financial instruments that are designated, and qualify, as fair value hedges and that prove to be highly effective in relation to the hedged risk, are included in net trading income together with the corresponding change in the fair value of the hedged asset or liability that is attributable to the risk that is being hedged. Unrealised gains and losses arising on hedged assets or liabilities which are attributable to the hedged risk are adjusted against the carrying amounts of the hedged assets or liabilities in the consolidated statement of financial position. If the hedge no longer meets the criteria for hedge accounting, any adjustment to the carrying amount of a hedged interest-bearing financial instrument is amortised to income over the remaining period to maturity.

Changes in the fair values of derivative financial instruments that are designated, and qualify, as cash flow hedges and that prove to be highly effective in relation to the hedged risk, are recognised in other comprehensive income. Unrealised gains or losses recognised in other comprehensive income are transferred to the consolidated statement of income at the same time that the income or expense of the corresponding hedged item is recognised in the consolidated statement of income and are included in the same income or expense category as the hedged item. Unrealised gains or losses on any ineffective portion of cash flow hedging transactions are included in net trading income.

The interest component of derivatives that are designated, and qualify, as fair value or cash flow hedges is included in interest income or interest expense relating to the hedged item over the life of the derivative instrument.

Hedge accounting is discontinued when the derivative hedging instrument either expires or is sold, terminated or exercised, or no longer qualifies for hedge accounting. Gains and losses arising on the termination of derivatives designated as cash flow hedges are recognised in interest income or interest expense over the original tenor of the terminated hedge transaction.

Some hybrid instruments contain both a derivative and non-derivative component. In such cases, the derivative is categorised as an embedded derivative. If the economic characteristics and risks of the embedded derivative are not closely related to those of the host contract, and the overall contract itself is not carried at fair value, the embedded derivative is bifurcated and measured at fair value. If it is not practically possible to bifurcate the embedded derivative, the entire hybrid instrument is categorised as held-for-trading and measured at fair value. Changes in fair value are included in net trading income.

2. ACCOUNTING POLICIES (continued)

2.12 Financial guarantees

Financial guarantees are contracts that require the Group to make specified payments to reimburse the holder for a loss it incurs because a specific debtor fails to make payment when due in accordance with the terms of a debt instrument. Financial guarantees are issued to financial institutions and other counterparties on behalf of customers to secure loans, overdrafts and other banking facilities, and to other parties in relation to the performance of customers under obligations related to contracts, advance payments made by other parties, tenders and retentions.

Financial guarantees are initially recognised at fair value on the date the guarantee is issued. The guarantee liability is subsequently measured at the higher of the initial measurement, less amortisation to recognise the fee income earned over the period, and the present value of any expected financial obligation arising as a result of an anticipated non-recoverable payment under a guarantee. Any increase in a liability relating to guarantees is recognised in the consolidated statement of income. In the consolidated statement of financial position, financial guarantees are included in other liabilities.

2.13 Post retirement benefits

The majority of the Group's employees are eligible for post retirement benefits under either defined benefit or defined contribution pension plans which are provided through separate trustee-administered funds or insurance plans. The Group also pays contributions to Government defined contribution pension plans in accordance with the legal requirements in each location.

The Group's contributions to defined contribution pension plans are expensed in the year to which they relate.

The pension costs for defined benefit pension plans are assessed using the projected unit credit method. The cost of providing pensions is charged to income so as to spread the regular cost of pensions over the service lives of the employees, in accordance with the advice of an independent qualified actuary who conducts a full valuation of the plan every three years. The pension obligation is measured as the present value of the estimated future cash flows using interest rates of government securities which have terms to maturity approximating the terms of the related liability.

Actuarial gains and losses are recognised in income when the net cumulative unrecognised actuarial gain or loss at the end of the previous financial year exceeds 10 per cent of the higher of: (i) the fair value of the plan assets, and (ii) the present value of the fund obligations. That portion of the net cumulative unrecognised actuarial gain or loss is recognised in income over the expected average remaining working lives of the employees participating in the plan. Otherwise, the actuarial gain or loss is not recognised.

2.14 Taxation

a) Current tax

Current taxation is the expected tax payable on the taxable income for the year, using tax rates enacted at the balance sheet date, and includes any adjustments to tax payable in respect of previous years.

b) Deferred tax

Deferred tax is provided, using the liability method, for temporary differences arising between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes. A deferred tax asset is recognised only to the extent that it is probable that future taxable income will be available against which the unutilised tax losses and credits can be utilised. Currently enacted tax rates are used to determine deferred taxes.

2.15 Cash and cash equivalents

In the consolidated statement of cash flows, cash and cash equivalents comprise cash and other liquid assets.

2.16 Segment reporting

An operating segment is a distinguishable component of the Group that is engaged in business activities from which revenues are earned and expenses are incurred, including revenues and expenses that relate to transactions with any of the Group's other operating segments. All segments have discrete financial information which is regularly reviewed by the Group's Management Committee, being the Group's chief operating decision maker, to make decisions about resources allocated to the segment and to assess its performance.

2.17 Fiduciary activities

The Group administers and manages assets owned by clients which are not reflected in the consolidated financial statements. Asset management fees are earned for providing investment management services and for managing mutual fund products. Asset administration fees are earned for providing custodial services. Fees are recognised as the services are provided and are included in fee and commission income.

2. ACCOUNTING POLICIES (continued)

2.18 Dividends

Dividends on issued shares are recognised as a liability and deducted from equity when they are approved by the Bank's shareholders.

2.19 Comparatives

Where necessary, comparative figures have been adjusted to conform with changes in presentation in the current year.

2.20 Future accounting developments

The International Accounting Standards Board (IASB) have issued a number of new standards, amendments to standards, and interpretations that are not yet effective and have not been applied in the preparation of the consolidated financial statements for the year ended 31st December 2010. The relevant new standards, amendments to standards, and interpretations, are as follows:-

- IFRS 9 - Financial Instruments. The new standard is effective for financial years beginning on or after 1st January 2013. The standard amends the measurement categories currently defined under IAS 39, specifically, held-to-maturity, loans and receivables and available-for-sale categories are eliminated. The standard also amends the accounting for embedded derivatives and the rules regarding derecognition of financial assets and liabilities. The Group is currently evaluating the potential effect of this standard which is expected to require certain valuation and associated presentational changes.

3. ACCOUNTING ESTIMATES AND ASSUMPTIONS

The preparation of the consolidated financial statements requires management to make estimates and assumptions that affect the reported amounts of certain financial assets, liabilities, income and expenses.

The use of estimates and assumptions is principally limited to the determination of provisions for impairment, the valuation of financial instruments, and the valuation of the Group's defined benefit pension plan as explained in more detail below:-

Provisions for impairment

Financial assets are evaluated for impairment on the basis set out in note 2.5.

In determining provisions for impairment, judgement is required in the estimation of the amount and timing of future cash flows.

In addition to provisions for impairment against specific assets, the Group also maintains provisions that are measured and recognised on a collective basis. Key assumptions included in the measurement of the portfolio provisions include data on the probability of default and the eventual recovery amount in the event of a forced sale or write off. These assumptions are based on observed historical data and updated as considered appropriate to reflect current conditions. The accuracy of the portfolio provisions would therefore be affected by unexpected changes in these assumptions.

Equity securities classified as available-for-sale are considered to be impaired when there has been a significant or prolonged decline in fair value below cost. The determination of significant or prolonged requires judgement. In making the judgement, a number of factors are taken into account including the normal volatility in valuation, evidence of a deterioration in the financial condition of the investee, industry and sector performance, and operational and financing cash flows.

Fair value of financial assets and liabilities

Where the fair value of financial assets and liabilities cannot be derived from active markets, they are determined using a variety of valuation techniques that include the use of mathematical models. The input to these models is derived from observable markets where available, but where this is not feasible, a degree of judgement is required in determining assumptions used in the models. Changes in assumptions used in the models could affect the reported fair value of financial assets and liabilities.

Retirement benefit obligations

Management, in coordination with an independent qualified actuary, are required to make assumptions regarding the defined benefit pension plan, changes in which could affect the reported liability, service cost and expected return on pension plan assets. The principal actuarial assumptions for the defined benefit pension plan are set out in note 11 and include assumptions on the discount rate, expected return on pension plan assets, mortality, future salary increases, and inflation. Changes in the assumptions could affect the reported asset, service cost and expected return on pension plan assets.

4. CLASSIFICATION OF ASSETS & LIABILITIES

The classification of assets and liabilities by accounting categorisation was as follows:-

	Held-to- maturity	Loans and receivables	Held-for- trading	Available- for-sale	Financial liabilities at amortised cost	Non- financial assets & liabilities	Total
At 31st December 2010	US\$ millions	US\$ millions	US\$ millions	US\$ millions	US\$ millions	US\$ millions	US\$ millions
Cash and other liquid assets	927.6	116.3					1,043.9
Placements	3,576.3	110.5	-	-	-	-	3,576.3

Total liabilities & equity		-	137.5	_	14,133.4	1,936.8	16,207.7

The held-for-trading category includes the fair values of derivatives designated as fair value and cash flow hedges.

The Group did not have any financial assets or financial liabilities classified as fair value through the statement of income, other than those classified as held-for-trading, at either 31st December 2010 or 31st December 2009.

5. CASH AND OTHER LIQUID ASSETS

	31.12.10	31.12.09
	US\$ millions	US\$ millions
Cash and balances with banks	116.3	230.6
Certificates of deposit	721.0	251.0
Reverse repos	180.0	_
Government bills	26.6	26.6
	1,043.9	508.2

6. PLACEMENTS

Placements at 31st December 2010 included placements with central banks amounting to US\$633.5 million (2009: US\$1,251.2 million). The placements with central banks represented the placement of surplus liquid funds.

7. TRADING SECURITIES

	31.12.10	31.12.09
	US\$ millions	US\$ millions
Debt securities	50.0	-
Managed funds	29.4	50.2
Listed equities	0.3	_
	79.7	50.2

Debt securities comprise investments in debt securities issued by governments, quasi-government entities, and government-owned entities.

Managed funds comprise funds placed for investment with specialist managers.

8. INVESTMENT SECURITIES

a) Composition

The credit rating profile of investment securities, based on the lowest rating assigned by the major international rating agencies, was as follows:-

		31.12.10		31.12.09
	US\$ millions	%	US\$ millions	%
AAA to A- / Aaa to A3	2,435.8	89.4	1,404.8	76.1
BBB+ to BBB- / Baa1 to Baa3	207.6	7.6	365.1	19.8
Other debt securities	81.5	3.0	76.6	4.1
Total debt securities	2,724.9	100.0	1,846.5	100.0
Equity investments	342.9		171.6	
	3,067.8	-	2,018.1	

Investment securities principally comprise investment-grade rated debt securities issued by major international financial institutions and government-related entities.

At 31st December 2010, 89.4 per cent of debt securities were rated A- / A3 or above (2009: 76.1 per cent).

Equity investments at 31st December 2010 included listed equities amounting to US\$190.0 million received in settlement of a secured past due loan.

b) Provisions for impairment

The movements in the provisions for the impairment of investment securities were as follows:-

	2010	2009
	US\$ millions	US\$ millions
At 1st January	97.5	776.5
Exchange rate movements	(0.5)	(8.0)
Amounts utilised	(24.2)	(630.2)
Release for the year	(5.0)	(48.0)
At 31st December	67.8	97.5

The amounts utilised during the year ended 31st December 2010 principally comprised amounts written off on the redemption of externally managed funds. The redemptions resulted in the release of unutilised provisions for impairment and no incremental losses arose as a result of the redemptions.

The amounts utilised during the year ended 31st December 2009 principally comprised US\$563.5 million on the write off of the Group's investments in structured investment vehicles (SIVs), and write offs of US\$49.5 million on the settlement of credit default swaps. The write offs on the SIVs and credit default swaps were fully covered by specific provisions for impairment. No incremental losses arose as a result of the write offs.

8. INVESTMENT SECURITIES (continued)

c) Impaired securities

Impaired securities represent securities for which there is objective evidence that the Group will not collect all amounts due, including both principal and interest, in accordance with the contractual terms of the security.

Impaired investment securities and the related specific provisions for impairment were as follows:-

		31.12.10			31.12.09	
	Gross	Impairment provisions	Carrying amount	Gross	Impairment provisions	Carrying amount
	US\$ millions	US\$ millions	US\$ millions	US\$ millions	US\$ millions	US\$ millions
Equity investments	57.7	44.2	13.5	84.1	67.2	16.9
Non-specific / portfolio provisions	-	23.6	-		30.3	
Total provisions for impairment		67.8			97.5	

Total specific provisions for impairment at 31st December 2010 represented 76.6 per cent of gross impaired investment securities (2009: 79.9 per cent).

There were no past due debt securities at 31st December 2010 or 31st December 2009.

d) Unquoted equity investments

Investment securities at 31st December 2010 included US\$106.9 million (2009: US\$125.2 million) of unquoted equity investments for which fair values cannot be reliably measured. These investments are stated at cost less provision for impairment. They principally represent private equity investments and investments in managed entities, the underlying investments of which are primarily of either a corporate debt or private equity nature, managed by external specialist managers and international investment banks. There are no active markets or other appropriate methods from which to derive reliable fair values for these investments. The Group intends to exit these investments principally by means of IPOs or private placements.

e) Reclassified securities

At 1st October 2008, and in accordance with the amendments to IAS 39 - Financial Instruments: Recognition and Measurement, a number of externally managed funds that were no longer held for the purpose of sale in the short term were reclassified from held-for-trading to available-for-sale. Due to the adverse impact of the severe market conditions prevailing at the time, which was considered to meet the IAS 39 amendment definition of a rare event, the managed funds are closed to redemptions for the foreseeable future. The funds were reclassified at their net asset values on the date of transfer on 1st October 2008. The movements in the carrying amount of the reclassified funds were as follows:-

At 1st October 2008 60.8 Provisions for impairment (37.7) Net movement 4.2 At 31st December 2008 27.3 Net movement (8.3) At 31st December 2009 19.0 Net movement (2.1)		Carrying
At 1st October 2008 60.8 Provisions for impairment (37.7) Net movement 4.2 At 31st December 2008 27.3 Net movement (8.3) At 31st December 2009 19.0 Net movement (2.1)		***************************************
Provisions for impairment (37.7) Net movement 4.2 At 31st December 2008 27.3 Net movement (8.3) At 31st December 2009 19.0 Net movement (2.1)		US\$ millions
Net movement 4.2 At 31st December 2008 27.3 Net movement (8.3) At 31st December 2009 19.0 Net movement (2.1)	At 1st October 2008	60.8
At 31st December 2008 27.3 Net movement (8.3) At 31st December 2009 19.0 Net movement (2.1)	Provisions for impairment	(37.7)
Net movement (8.3) At 31st December 2009 19.0 Net movement (2.1)	Net movement	4.2
At 31st December 2009 Net movement (2.1)	At 31st December 2008	27.3
Net movement (2.1)	Net movement	(8.3)
(2.1)	At 31st December 2009	19.0
	Net movement	(2.1)
At 31st December 2010	At 31st December 2010	16.9

During 2008, subsequent to the date of transfer, no amounts were recognised in income other than provisions for impairment. During 2010, realised gains of US\$0.7 million (2009: US\$0.5 million) were recognised as realised profits on investment securities in other income in the consolidated statement of income. These profits would have been recognised as trading income had the assets not been reclassified.

9. LOANS AND ADVANCES

	31.12.10	31.12.09
	US\$ millions	US\$ millions
Gross loans and advances	8,152.4	9,932.2
Provisions for impairment	(642.3)	(634.1)
Net loans and advances	7,510.1	9,298.1

9. LOANS AND ADVANCES (continued)

a) Industrial classification

The classification of loans and advances by industry was as follows:-

	31.12.10	31.12.09
	US\$ millions	US\$ millions
Energy, oil and petrochemical	3,010.8	3,135.5
Trading and services	1,192.5	1,349.6
Financial	1,103.7	1,620.4
Transportation	812.9	827.8
Manufacturing	595.7	691.9
Construction	533.3	641.0
Real estate	361.5	768.0
Communication	266.8	446.4
Government	185.9	320.1
Other	89.3	131.5
	8,152.4	9,932.2
Provisions for impairment	(642.3)	(634.1)
	7,510.1	9,298.1

The classification of loans and advances by industry reflects the Group's historical strategic focus on project and structured finance in the Gulf Cooperation Council (GCC) states.

Gross loans at 31st December 2010 included Islamic-related transactions amounting to US\$1,582.4 million (2009: US\$2,043.4 million).

b) Provisions for impairment

The movements in the provisions for the impairment of loans and advances were as follows:-

		2010			2009	
	Specific	Non- Specific	Total	Specific	Non- Specific	Total
	US\$ millions	US\$ millions	US\$ millions	US\$ millions	US\$ millions	US\$ millions
At 1st January	394.1	240.0	634.1	94.2	180.0	274.2
Amounts utilised	(0.8)	-	(0.8)	(1.8)	_	(1.8)
Charge for the year	4.0	5.0	9.0	301.7	60.0	361.7
At 31st December	397.3	245.0	642.3	394.1	240.0	634.1

The level of non-specific loan provisions reflect the application of higher probabilities of default in the calculation of provisions for impairment measured on a collective basis. Higher probabilities of default are anticipated to result from the impact of the global recession on the regional economic environment. The probabilities of default applied in the calculation of the collective provisions of impairment equate to a speculative-grade mean default rate of 13.9 per cent, exceeding the previous historical high corporate default levels witnessed in July 1991.

Non-specific provisions at 31st December 2010 represented 3.3% of non-specifically provisioned loans (2009: 2.6%).

Amounts utilised during the years ended 31st December 2010 and 31st December 2009 represented provisions utilised on the settlement of the related loans.

c) Past due loans

The gross and carrying amounts of loans for which either principal or interest was over 90 days past due were as follows:-

		<u>31.1</u>	<u>2.10</u>			31.1:	2.09	
	Gro		Carrying		Gro	ss	Carrying a	amount
		Financial	_	Financial		Financial		Financial
	Corporates	institutions	Corporates	institutions	Corporates	institutions	Corporates	institutions
	US\$ millions							
Secured	84.3		84.3	-	198.1		198.1	_
Unsecured								
Under restructuring)							
and current	477.2	-	381.6	-	61.0	-	30.5	-
Other	154.7	169.4	41.3	23.7	147.8	155.4	35.3	25.4
Total Unsecured	631.9	169.4	422.9	23.7	208.8	155.4	65.8	25.4

Corporates include loans extended for investment purposes.

Net unsecured past due loans of US\$446.6 million included US\$381.6 million of loans that are subject to restructuring programmes and for which interest is current and being paid on due dates. The restructurings are expected to be finalised within the six months ended 30th June 2011, following which the loans will revert to performing status. The restructuring programmes are not anticipated to result in an economic loss for the Group.

9. LOANS AND ADVANCES (continued)

c) Past due loans (continued)

The overdue status of past due but not impaired loans based on original contractual maturities was as follows:-

	31.12.10	31.12.09
	US\$ millions	US\$ millions
Less than 1 year	235.7	-
Years 2 to 5	26.7	198.1
	262.4	198.1

At 31st December 2010 interest-in-suspense on past due loans amounted to US\$59.5 million (2009: US\$25.4 million).

d) Renegotiated loans

There were no renegotiated loans during either the year ended 31st December 2010 or 31st December 2009. Renegotiated loans are loans that have been restructured due to a deterioration in the borrower's financial position and where the Group has made concessions that it would not have otherwise considered.

e) Collateral

During the year ended 31st December 2010, the Group took possession of listed equities received in settlement of a secured past due loan. The equities are classified as investment securities. The carrying amount of the equities at 31st December 2010 is set out in note 8(a).

10. OTHER ASSETS

	31.12.10	31.12.09
	US\$ millions	US\$ millions
Accrued interest, fees and commissions	77.1	57.8
Derivative financial instruments	67.1	60.6
Premises and equipment	37.1	40.4
Prepaid pension cost	16.5	17.6
Prepayments	8.0	10.0
Deferred items	4.8	4.0
Other, including accounts receivable	39.3	41.6
	249.9	232.0

Derivative financial instruments represent the positive fair values of derivative financial instruments entered into for trading purposes, or designated as fair value or cash flow hedges. An analysis of the fair value of derivative financial instruments is set out in note 30(d).

An analysis of the prepaid pension cost is set out in note 11.

11. POST RETIREMENT BENEFITS

The Group contributes to defined benefit and defined contribution pension plans which cover substantially all of its employees.

The Bank maintains defined contribution pension plans for the majority of its employees. Contributions are based on a percentage of salary. The amounts to be paid as retirement benefits are determined by reference to the amounts of the contributions and investment earnings thereon. The total cost of contributions to defined contribution pension plans for the year ended 31st December 2010 amounted to US\$5.1 million (2009: US\$5.3 million).

The Bank's principal subsidiary, Gulf International Bank (UK) Limited (GIBUK), maintains a defined benefit pension plan for a number of its employees. The assets of the plan are held independently of the subsidiary's assets in a separate trustee administered fund. The pension costs are charged to income so as to spread the regular cost of the pensions over the service lives of the employees, in accordance with the advice of an independent qualified actuary who conducts a full valuation of the plan every three years using the projected unit credit method. In the intervening years the calculation is updated based on information received from the actuary. The latest full actuarial valuation was carried out at 1st January 2008.

a) The amount recognised in the consolidated statement of financial position is analysed as follows:-

	31.12.10	31.12.09
	US\$ millions	US\$ millions
Fair value of plan assets	148.0	144.8
Present value of fund obligations	152.5	149.8
Plan deficit	(4.5)	(5.0)
Unrecognised actuarial loss	21.0	22.6
Net asset in the consolidated statement of financial position	16.5	17.6

11. POST RETIREMENT BENEFITS (continued)

b) The movements in the fair value of plan assets were as follows:-

	2010	2009
	US\$ millions	US\$ millions
At 1st January	144.8	117.5
Expected return on plan assets	7.3	7.1
Contributions paid by the Group	0.8	1.5
Benefits paid by the plan	(3.6)	(3.1)
Actuarial gains	5.3	7.0
Exchange rate movements	(6.6)	14.8
At 31st December	148.0	144.8

The plan assets at 31st December 2010 comprise equity and debt securities in the ratio of 34 per cent and 66 per cent respectively (2009: 30 per cent and 70 per cent respectively). Cash holdings within the plan assets are included in debt securities.

The expected and actual returns on the plan assets for the year ended 31st December 2010 were US\$7.3 million and US\$12.9 million respectively (2009: US\$7.1 million and US\$10.5 million respectively). The overall expected rate of return on the plan assets is determined based on market prices, applicable to the period over which the obligation is to be settled. The expected return is determined separately for equity and debt securities.

c) The movements in the present value of fund obligations were as follows:-

obligations were as follows	2010	2009
-	US\$ millions	US\$ millions
	149.8	101.5
	0.9	1.1
	8.1	7.7

_	16.5	17.6
	in the consolidated statement of financial position were as follows:-	2010

The Group paid US\$0.8 million in contributions to the plan during 2010 and expects to pay US\$0.8 million during 2011.

e) The amounts recognised in the consolidated statement of income were as follows:-

	2010	2009
	US\$ millions	US\$ millions
Current service cost	0.9	1.1
Interest cost	8.1	7.7
Expected return on plan assets	(7.3)	(7.1)
Amortisation of actuarial loss	1.3	-
Gains on curtailments and settlements	-	(1.2)
Net expense included in staff expenses	3.0	0.5
f) The principal actuarial assumptions used for accounting purposes were as follows:-		
	2010	2009
Discount rate	5.6%	5.7%
Expected return on plan assets - equities	7.7%	7.3%
Expected return on plan assets - bonds	5.4%	5.1%
Future salary increases	4.8%	4.8%
Future increases to pensions in payment	3.6%	3.4%

11. POST RETIREMENT BENEFITS (continued)

g) Historical information

	2010	2009	2008	2007	2006
	US\$ millions				
Fair value of plan assets	148.0	144.8	117.5	169.9	132.5
Present value of fund obligations	152.5	149.8	101.5	162.5	161.7
Plan (deficit) / surplus	(4.5)	(5.0)	16.0	7.4	(29.2)
Experience gains on plan assets	4.8	10.0	3.2	4.2	3.5
Experience (losses) / gains on plan liabilities	(3.5)	(2.6)	(14.6)	(1.2)	0.3

12. DEPOSITS

Deposits from customers include deposits from central banks.

The geographical composition of total deposits was as follows:-

33	31.12.10	31.12.09
	US\$ millions	US\$ millions
GCC countries	6,749.6	6,609.1
Other Middle East and North Africa countries	654.8	2,540.5
Other countries	1,299.2	899.9
	8,703.6	10,049.5

GCC deposits comprise deposits from GCC country governments and central banks and other institutions headquartered in the GCC states.

At 31st December 2010, GCC deposits represented 77.5 per cent of total deposits (2009: 65.8 per cent).

The significant decrease in deposits from Other Middle East and North Africa countries during the year ended 31st December 2010 reflected pro-active actions taken by the Group to reduce depositor concentrations as part of a programme to enhance and strengthen the Group's funding profile and liquidity management.

Total deposits at 31st December 2010 included Islamic-related transactions amounting to US\$2,022.8 million (2009: US\$1,459.2 million). Islamic-related transactions comprised murabaha contracts.

13. SECURITIES SOLD UNDER AGREEMENTS TO REPURCHASE

The Group enters into collateralised borrowing transactions (repurchase agreements) in the ordinary course of its financing activities. Collateral is provided in the form of securities held within the investment securities portfolio. At 31st December 2010, the fair value of investment securities that had been pledged as collateral under repurchase agreements was US\$1,002.0 million (2009: US\$858.2 million). The collateralised borrowing transactions are conducted under standardised terms that are usual and customary for such transactions.

In addition to the repurchase agreements mentioned above, during the year ended 31st December 2010 a contractual standby facility was concluded providing the Group access to US\$500.0 million of collateralised funding based on pre-determined terms. The facility is available to be drawn, in full or in part, at the Group's discretion between 1st February 2011 and 31st January 2012.

14. OTHER LIABILITIES

	31.12.10	31.12.09
	US\$ millions	US\$ millions
Derivative financial instruments	86.2	137.5
Deferred items	62.1	53.2
Accrued interest	48.4	39.6
Other, including accounts payable and accrued expenses	76.3	64.6
	273.0	294.9

Derivative financial instruments represent the negative fair values of derivative financial instruments entered into for trading purposes, or designated as fair value or cash flow hedges. An analysis of the fair value of derivative financial instruments is set out in note 30(d).

15. SENIOR TERM FINANCING

	Maturity	31.12.10	31.12.09
		US\$ millions	US\$ millions
Floating rate loans	2011	360.0	360.0
Floating rate loan	2012	1,200.0	1,200.0

Islamic murabaha term facility	2012	50.0	50.0
Islamic murabaha term facility	2013	100.0	-
Floating rate note	2015	933.3	-
Floating rate loans	2010	-	850.0
Islamic murabaha term facility	2010	-	14.6
		3,176.6	3,007.9

At 31st December 2010, senior term financing amounting to US\$360.0 million was contractually due to mature within the subsequent twelve months (2009: US\$864.6 million). During the year ended 31st December 2010, the Group raised US\$1,033.3 million of new senior term finance (2009: US\$883.3 million).

16. SUBORDINATED TERM FINANCING

	Maturity	31.12.10 US\$ millions	31.12.09 US\$ millions
Floating rate note	2015	361.0	361.0
Floating rate loans	2016	150.0	150.0
		511.0	511.0

The subordinated term financing facilities represent unsecured obligations of the Group and are subordinated in right of payment to the claims of depositors and other creditors of the Group that are not also subordinated. The subordinated financing facilities have been approved for inclusion in tier 2 capital for capital adequacy purposes by the Bank's regulator, the Central Bank of Bahrain.

17. SHARE CAPITAL

The authorised share capital at 31st December 2010 comprised 3.0 billion shares of US\$1 each (2009: 3.0 billion shares of US\$1 each). The issued share capital at 31st December 2010 comprised 2.5 billion shares of US\$1 each (2009: 2.5 billion shares of US\$1 each). All issued shares are fully paid.

18. RESERVES

18. RESERVES (continued)

In accordance with the Bank's articles of association, 10 per cent of the Bank's net profit for the year is required to be transferred to each of the compulsory and voluntary reserves. Transfers to the non-distributable compulsory reserve are required until such time as this reserve represents 50 per cent of the issued share capital of the Bank. The voluntary reserve may be utilised at the discretion of the Board of

19. DIVIDENDS

No dividend is proposed in respect of the financial year ended 31st December 2010.

20. NET INTEREST INCOME

	2010	2009
Interest income	US\$ millions	US\$ millions
Placements and other liquid assets	28.1	56.5
Investment securities	36.9	77.1
Loans and advances	207.4	329.2
Total interest income	272.4	462.8
Interest expense		
Deposits from banks and customers	61.5	193.4
Securities sold under agreements to repurchase	3.4	24.0
Term financing	51.3	38.9
Total interest expense	116.2	256.3
Net interest income	156.2	206.5

Interest income on loans and advances includes loan origination fees that form an integral part of the effective interest rate of the loan.

Accrued but uncollected interest on impaired loans included in interest income for the year ended 31st December 2010 amounted to US\$0.5 million (2009: US\$1.3 million). There was no accrued but uncollected interest included in interest income on past due loans or past due investment securities for either the year ended 31st December 2010 or 31st December 2009.

21. FEE AND COMMISSION INCOME

	2010	2009
	US\$ millions	US\$ millions
Fee and commission income		
Investment banking and management fees	24.4	24.6
Commissions on letters of credit and guarantee	16.0	14.7
Loan commitment fees	1.2	1.5
Other fee and commission income	1.5	1.6
Total fee and commission income	43.1	42.4
Fee and commission expense	(0.9)	(1.7)
Net fee and commission income	42.2	40.7

Investment banking and management fees comprise fees relating to the provision of investment management and financial services, including asset and fund management, underwriting activities, and services relating to structured financing, privatisations, IPOs, and mergers and acquisitions.

Investment banking and management fees for the year ended 31st December 2010 included fee income relating to the Group's fiduciary activities amounting to US\$15.2 million (2009: US\$17.7 million).

Fee and commission expense principally comprises security custody fees.

22. NET TRADING INCOME

	2010	2009
	US\$ millions	US\$ millions
Foreign exchange	8.7	11.2
Managed funds	3.5	13.0
Interest rate derivatives	0.5	1.3
Debt securities	~	2.7
	12.7	28.2

Trading income comprises gains and losses arising both on the purchase and sale, and from changes in the fair value, of trading instruments, together with the related interest income, interest expense and dividend income. Trading income accordingly incorporates all income and expenses related to the Group's trading activities.

Foreign exchange includes spot and forward foreign exchange contracts, and currency futures and options.

Interest rate derivatives includes interest rate swaps, forward rate agreements, interest rate options, interest rate futures, and credit

An analysis of the basis used for determining the fair values of held-for-trading financial assets and liabilities is set out in note 36.

23. OTHER INCOME

Other income principally comprises dividends on available-for-sale equity investments and profits realised on the sale of investment securities. Other income for the year ended 31st December 2009 also included profits of US\$8.3 million arising on the repurchase of

24. OTHER OPERATING EXPENSES

Other operating expenses for the year ended 31st December 2010 included US\$15.0 million of non-recurring costs associated with the implementation of the Group's new business strategy (2009: nil).

25. SEGMENTAL INFORMATION

Segmental information is presented in respect of the Group's business and geographical segments. The primary reporting format, business segments, reflects the manner in which financial information is evaluated by the Board of Directors and the Group Management Committee.

a) Business Segments

For financial reporting purposes, the Group is organised into four main operating segments:-

- Merchant Banking: the provision of wholesale commercial financing and other credit facilities for corporate and institutional customers, and the provision of financial advisory services relating to structured financing, privatisations, IPOs and mergers and acquisitions.
- Treasury: the provision of a broad range of treasury and capital market products and services to corporate and financial institution clients, money market, proprietary investment and trading activities and the management of the Group's balance sheet, including funding.
- Financial Markets: the provision of asset and fund management services.
- Corporate and support units: income arising on the investment of the Group's net free capital funds and expenses incurred by support units.

The results reported for the business segments are based on the Group's internal financial reporting systems. The accounting policies of the segments are the same as those applied in the preparation of these consolidated financial statements and are set out in note 2. Transactions between business segments are conducted on normal commercial terms and conditions. Transfer pricing between the business units is based on the market cost of funds.

Segment results, assets and liabilities comprise items directly attributable to the business segments. Liabilities reported for corporate and support units comprise senior and subordinated term finance facilities and related accrued interest, the cost of which is recharged to the relevant operating business segments.

b) Geographical segments

Although the Group's three main business segments are managed on a worldwide basis, they are considered to operate in two geographical markets: the GCC and the rest of the world.

The geographical composition of total income and total assets based on the location in which transactions are booked and income is recorded was as follows:-

	<u>2010</u>		2009	
	Total	Total	Total	Total
	income	assets	income	assets
	US\$ millions	US\$ millions	US\$ millions	US\$ millions
Bahrain	153.4	11,238.8	195.9	10,932.4
Saudi Arabia	35.0	2,231.4	42.6	3,013.9
Total GCC	188.4	13,470.2	238.5	13,946.3
Other countries	35.4	2,057.5	47.5	2,261.4
	223.8	15,527.7	286.0	16,207.7

The geographical analyses of deposits and risk assets are set out in notes 12 and 27 respectively.

26. RISK MANAGEMENT

The principal risks associated with the Group's businesses are credit risk, market risk, liquidity risk and operational risk. The Group has a comprehensive risk management framework in place for managing these risks which is constantly evolving as the business activities change in response to credit, market, product and other developments. The risk management framework is guided by a number of overriding principles including the formal definition of risk management governance, an evaluation of risk appetite expressed in terms of formal risk limits, risk oversight independent of business units, disciplined risk assessment and measurement including Value-at-Risk (VaR) methodologies and portfolio stress testing, and risk diversification. The Board of Directors set the Group's overall risk parameters and risk tolerances, and the significant risk management policies. A Board Risk Policy Committee reviews and reports to the Board of Directors on the Group's risk profile and risk taking activities. A Management Committee, chaired by the Group Chief Executive Officer, has the primary responsibility for sanctioning risk taking activities and risk management policies within the overall risk parameters and tolerances defined by the Board of Directors. A Group Risk Committee, under the chairmanship of the Chief Risk Officer and comprising the Group's most senior risk professionals, provides a forum for the review and approval of risk measurement methodologies, risk control processes and the approval of new products. The Group Risk Committee also reviews all risk policies and limits that require the formal approval of the Management Committee. The risk management control process is based on a detailed structure of policies, procedures and limits, and comprehensive risk measurement and management information systems for the control, monitoring and reporting of risks. Periodic reviews by internal and external auditors and regulatory authorities subject the risk management processes to additional scrutiny which help to further strengthen the risk management environment.

The principal risks associated with the Group's businesses and the related risk management processes are described in detail in the Basel 2 Pillar 3 disclosure report in the Annual Report, and are summarised below together with additional quantitative analysis:-

a) Credit risk

Credit risk is the risk that counterparties will be unable to meet their obligations to the Group. Credit risk arises principally from the Group's lending and investment activities in addition to other transactions involving both on- and off-balance sheet financial instruments. Disciplined processes are in place at both the business unit and corporate level that are intended to ensure that risks are accurately assessed and properly approved and monitored. Formal credit limits are applied at the individual transaction, counterparty, country and portfolio levels. Overall exposures are also evaluated to ensure a broad diversification of credit risk. The credit management process involves the monitoring of concentrations by product, industry, single obligor, risk grade and geography, and the regular appraisal of counterparty credit quality through the analysis of qualitative and quantitative information.

Credit risk is actively managed and rigorously monitored in accordance with well-defined credit policies and procedures. Prior to the approval of a credit proposal, a detailed credit risk assessment is carried out which includes an analysis of the obligor's financial condition, market position, business environment and quality of management. The risk assessment generates an internal credit risk rating for each exposure, which affects the credit approval decision and the terms and conditions of the transaction. For cross border transactions an analysis of country risk is also conducted. The Group bases its credit decision for an individual counterparty on the aggregate Group exposure to that counterparty and all its related entities. Groupwide credit limit setting and approval authorisation requirements are conducted within Board approved guidelines, and the measurement, monitoring and control of credit exposures are done on a Groupwide basis in a consistent manner.

The Group also mitigates its credit exposures on foreign exchange and derivative financial instruments through the use of master netting agreements and collateral arrangements.

Maximum exposure to credit risk

The gross maximum exposure to credit risk before applying collateral, guarantees and other credit enhancements was as follows:-

	31.12.10	31.12.09
	US\$ millions	US\$ millions
Balance sheet items:		
Cash and other liquid assets	1,043.9	508.2
Placements	3,576.3	4,101.1
Trading securities	79.7	50.2
Investment securities	3,067.8	2,018.1
Loans and advances	7,510.1	9,298.1
Other assets, excluding derivative-related items	77.1	57.8
Total on-balance sheet credit exposure	15,354.9	16,033.5
Off-balance sheet items:	-	
Credit-related contingent items	2,149.9	2,160.4
Foreign exchange-related items	11.9	9.5
Derivative-related items	90.1	69.0
Total off-balance sheet credit exposure	2,251.9	2,238.9
Total gross credit exposure	17,606.8	18,272.4

26. RISK MANAGEMENT (continued)

a) Credit risk (continued)

Credit Risk Profile

The Group monitors, manages and controls credit risk exposures based on an internal credit rating system that rates individual obligors based on a rating scale from 1 to 10, subject to positive (+) and negative (-) modifiers for rating grades 2 to 6. The internal credit rating is a measure of the credit-worthiness of a single obligor, based on an assessment of the credit risk relating to senior unsecured, medium term, foreign currency credit exposure. The primary objectives of the internal credit rating system are the maintenance of a single uniform standard for credit quality measurement, and to serve as the primary basis for Board-approved risk parameters and delegated credit authority limits. The internal credit rating system also serves as a key input into the Group's risk-adjusted return on capital (RAROC) performance measurement system. Ratings are assigned to obligors, rather than facilities, and reflect a medium term time horizon, thereby rating through an economic cycle. The internal ratings map directly to the rating grades used by the international credit rating agencies as follows:-

			External R	ating
	Internal	Historical default	Fitch and	
Internal rating grade	classification	rate range Sta	ndard & Poor's	Moody's
		%		
Investment grade				
Rating grade 1	Standard	0.00 - 0.00	AAA	Aaa
Rating grade 2	Standard	0.00 - 0.04	AA	Aa
Rating grade 3	Standard	0.07 - 0.09	Α	Α
Rating grade 4	Standard	0.17 - 0.41	BBB	Baa
Sub-investment grade				
Rating grade 5	Standard	0.53 - 1.34	BB	Ва
Rating grade 6	Standard	2.70 - 9.86	В	В
Rating grade 7	Standard	27.98	CCC	Caa
Classified				
Rating grade 8	Substandard	27.98	CC	Ca
Rating grade 9	Doubtful	27.98	С	С
Rating grade 10	Loss	-	D	

The historical default rates represent the range of probability of defaults between the positive and negative modifiers for each rating grade based on Standard & Poor's one year default rates for the 29 years from 1981 to 2009 for senior unsecured obligations. The default rates represent the averages over the 29 year period and therefore reflect the full range of economic conditions over that period.

26. RISK MANAGEMENT (continued)

a) Credit risk (continued)

The credit risk profile, based on internal credit ratings, was as follows:-

31.12.10

31.12.09

— Neither past due nor impaired	Placements & other liquid assets US\$ millions	Securities US\$ millions	Loans and advances US\$ millions	Placements & other liquid assets US\$ millions	Securities US\$ millions	Loans and advances US\$ millions
Rating grades 1 to 4- Rating grades 5+ to 5- Rating grades 6+ to 6- Rating grade 7 Equity investments Carrying amount	4,570.2 50.0 - - - - 4,620.2	2,646.4 101.5 30.0 - 356.1 3,134.0	4,668.3 1,514.0 654.4 84.7 - - 6,921.4	4,573.3 36.0 - - - - 4,609.3	1,769.9 29.5 30.2 16.9 204.9	6,132.8 1,858.6 570.1 128.5 - 8,690.0

Rating grades 1 to 7 Rating grade 8 Rating grade 9 Equity investments	- - -	- - - 13.5	45.3 12.5 - -	- - -	- - - 16.9	257.2 36.3 25.3
Carrying amount	_	13.5	57.8	_	16.9	318.8
Total	4,620.2	3,147.5	7,510.1	4,609.3	2,068.3	9,298.1
The above analysis is reported net of the	ne following prov	risions for impai	rment:-			
Provisions for impairment		(67.8)	(642.3)	-	(97.5)	(634.1)

Individually impaired financial assets represent assets for which there is objective evidence that the Group will not collect all amounts due, including both principal and interest, in accordance with the contractual terms of the obligation.

The Group holds collateral against loans and advances in the form of physical assets, cash deposits, securities and guarantees. The amount and type of collateral is dependent upon the assessment of the credit risk of the counterparty. The market / fair value of the collateral is actively monitored on a regular basis and requests are made for additional collateral in accordance with the terms of the underlying agreements. Collateral is not usually held against securities or placements and no such collateral was held at either 31st December 2010 or 31st December 2009.

An analysis of the credit risk in respect of foreign exchange and derivative financial instruments is set out in note 30 while the notional and risk-weighted exposures for off-balance sheet credit-related financial instruments are set out in note 31.

26. RISK MANAGEMENT (continued)

a) Credit risk (continued)

Credit risk concentration

The Group monitors concentrations of credit risk by sector and by geographic location. The industrial classification of loans and advances is set out in note 9. The geographical distribution of risk assets is set out in note 27. An analysis of the credit risk in respect of foreign exchange and derivative financial instruments is set out in note 30.

Settlement risk

Settlement risk is the risk of loss due to the failure of a counterparty to honour its obligations to deliver cash, securities, or other assets as contractually agreed.

For certain types of transactions, the Group mitigates this risk by conducting settlements through a settlement or clearing agent to ensure that a trade is settled only when both parties have fulfilled their contractual settlement obligations. Settlement limits form part of the credit approval and limit monitoring process.

b) Market risk

Market risk is the risk of loss due to adverse changes in interest rates, foreign exchange rates, equity prices and market conditions, such as liquidity. The principal market risks to which the Group is exposed are interest rate risk, foreign exchange risk and equity price risk associated with its trading, investment and asset and liability management activities. The portfolio effects of holding a diversified range of instruments across a variety of businesses and geographic areas contribute to a reduction in the potential negative impact on earnings from market risk factors.

Trading market risk: The Group's trading activities principally comprise trading in debt and equity securities, foreign exchange and derivative financial instruments. Derivative financial instruments include futures, forwards, swaps and options in the interest rate, foreign exchange, equity, credit and commodity markets. The Group manages and controls the market risk within its trading portfolios through limit structures of both a VaR and non-VaR nature. Non-VaR based constraints relate, inter alia, to positions, volumes, concentrations, allowable losses and maturities. VaR is a risk measurement concept which uses statistical models to estimate, within a given level of confidence, the maximum potential negative change in the market value of a portfolio over a specified time horizon resulting from an adverse movement in rates and prices. It is recognised that there are limitations to the VaR methodology. These limitations include the fact that the historical data may not be the best proxy for future price movements. The Group performs regular back testing exercises to compare actual profits and losses with the VaR estimates to monitor the statistical validity of the VaR model. VaR is calculated based on the Group's market risk exposures at the close of the business each day. Intra-day risk levels may vary from those reported at the end of the day. In addition, losses beyond the specified confidence level are not captured by the VaR methodology. VaR is not a measure of the absolute limit of market risk and losses in excess of the VaR amounts will, on occasion, arise. To manage the risk associated with extreme market movements, the Group conducts stress testing which measures the impact of simulated abnormal changes in market rates and prices on the market values of the portfolios. The composition of the debt and equity trading securities is set out in note 7. An analysis of derivative financial instruments, including the VaR of foreign exchange and derivative trading contracts, is set out in note 30.

The VaR by risk class for the Group's trading positions, as calculated in accordance with the basis set out in note 33, was as follows:-

		<u>2010</u>			2009			
	31.12.10	Average	High	Low	31.12.09	Average	High	Low
	US\$ millions							
Interest rate risk	1.3	0.2	1.3	0.1	0.1	0.4	1.4	0.1
Foreign exchange risk	0.1	0.1	0.2	-	-	0.1	0.2	-
Equity risk	0.1	0.3	0.7	0.1	0.6	2.3	4.0	0.6
Total diversified risk	1.3	0.5	1.4	0.2	0.6	2.5	4.9	0.6

Non-trading market risk: Structural interest rate risk arises in the Group's core balance sheet as a result of mismatches in the repricing of interest rate sensitive financial assets and liabilities. The associated interest rate risk is managed within VaR limits and through the use of models to evaluate the sensitivity of earnings to movements in interest rates. The repricing profile and related interest rate sensitivity of the Group's financial assets and liabilities are set out in note 29. The Group is exposed to the impact of changes in credit spreads on the fair value of available-for-sale debt securities. Movements in the fair value of available-for-sale securities are accounted for in equity. Credit spread risk is managed within VaR limits and through the use of models to evaluate the sensitivity of changes in equity to movements in credit spreads. Based on the available-for-sale debt securities held at 31st December 2010, a 1 b.p. increase in credit spreads would result in a US\$0.8 million decrease in fair value (2009: US\$0.5 million). The Group does not maintain material foreign currency exposures. In general, the Group's policy is to match financial assets and liabilities in the same currency or to mitigate currency risk through the use of currency swaps. Details of significant foreign currency net open positions are set out in note 30(e).

26. RISK MANAGEMENT (continued)

b) Market risk (continued)

The more significant market risk-related activities of a non-trading nature undertaken by the Group, the related risks associated with those activities, and the types of derivative financial instruments used to manage and mitigate such risks are summarised as follows:-

Activity	Risk	Risk Mitigant
Management of the return on variable rate assets funded by shareholders' funds	Reduced profitability due to a fall in short term interest rates	Receive fixed interest rate swaps
Fixed rate assets funded by floating rate liabilities	Sensitivity to increases in short term interest rates	Pay fixed interest rate swaps
Investment in foreign currency assets	Sensitivity to strengthening of US\$ against other currencies	Currency swaps
Profits generated in foreign currencies	Sensitivity to strengthening of US\$ against other currencies	Forward foreign exchange contracts and purchased currency options

c) Liquidity risk

Liquidity risk is the risk that sufficient funds are not available to meet the Group's financial obligations on a punctual basis as they fall due.

Liquidity management policies are designed to ensure that funds are available at all times to meet the funding requirements of the Group, even in adverse conditions. In normal conditions the objective is to ensure that there are sufficient funds available not only to meet current financial commitments but also to facilitate business expansion. These objectives are met through the application of prudent liquidity controls. These controls provide security of access to funds without undue exposure to increased costs from the liquidation of assets or the aggressive bidding for deposits. The Group's liquidity controls ensure that, over the short term, the future profile of cash flows from maturing assets is adequately matched to the maturity of liabilities. Liquidity controls also provide for the maintenance of a stock of liquid and readily realisable assets and a diversified deposit base in terms of both maturities and range of depositors.

The management of liquidity and funding is primarily conducted in the Group's individual geographic entities within limits set and approved by the Board of Directors. The limits take account of the depth and liquidity of the market in which the entity operates. It is the Group's general policy that each geographic entity should be self-sufficient in relation to funding its own operations.

The Group's liquidity management policies include the following:-

- the monitoring of (i) future contractual cash flows against approved limits, and (ii) the level of liquid assets available in the event of a stress event
- the monitoring of balance sheet liquidity ratios
- the monitoring of the sources of funding in order to ensure that funding is derived from a diversified range of sources
- the monitoring of depositor concentrations in order to avoid undue reliance on individual depositors
- the maintenance of a satisfactory level of term financing; and
- the maintenance of liquidity and funding contingency plans. These plans identify early indicators of stress conditions and prescribe the actions to be taken in the event of systemic or other crisis, while minimising adverse long term implications for the Group's business activities.

The Group has established limits which restrict the volume of liabilities maturing in the short term. An independent risk management function monitors the future cash flow maturity profile against approved limits on a daily basis. The cash flows are monitored against limits applying to both daily and cumulative cash flows occurring over a 30 day period. The cash flow analysis is also monitored on a weekly basis by the Assets and Liabilities Committee (ALCO).

Customer deposits form a significant part of the Group's funding. The Group places considerable importance on maintaining the stability of both its customer and interbank deposits. The stability of deposits depends on maintaining confidence in the Group's financial strength and financial transparency.

The maturity profile of assets and liabilities is set out in note 28. An analysis of debt investment securities by rating classification is set out in note 26(a).

26. RISK MANAGEMENT (continued)

d) Operational risk

Operational risk is the risk of unexpected losses resulting from inadequate or failed internal controls or procedures, systems failures, fraud, business interruption, compliance breaches, human error, management failure or inadequate staffing.

A framework and methodology has been developed to identify and control the various operational risks. While operational risk cannot be entirely eliminated, it is managed and mitigated by ensuring that the appropriate infrastructure, controls, systems, procedures, and trained and competent people are in place throughout the Group. A strong internal audit function makes regular, independent appraisals of the control environment in all identified risk areas. Adequately tested contingency arrangements are also in place to support operations in the event of a range of possible disaster scenarios.

e) Capital management

The Group's lead regulator, the Central Bank of Bahrain (CBB), sets and monitors capital requirements for the Group as a whole. The parent company and individual banking operations are directly supervised by their local regulators.

As referred to in more detail in note 33, the Group adopted the Basel 2 capital adequacy framework with effect from 1st January 2008

In applying current capital requirements, the CBB requires the Group to maintain a prescribed minimum ratio of total regulatory capital to total risk-weighted assets. The CBB's minimum risk asset ratio is 12 per cent compared to a minimum ratio of 8 per cent prescribed by the Basel Committee on Banking Supervision. The Group calculates regulatory capital requirements for general market risk in its trading portfolios using a Value-at-Risk model and uses the CBB's prescribed risk weightings under the standardised approach to determine the risk-weighted amounts for credit risk and specific market risk. Operational risk is calculated by applying the CBB's prescribed alpha co-efficient to the Group's average gross income for the preceding three financial years.

The Group's regulatory capital is analysed into two tiers:-

- Tier 1 capital, comprising issued share capital, share premium, retained earnings and reserves, adjusted to exclude revaluation gains and losses arising on the remeasurement to fair value of available-for-sale securities and derivative cash flow hedging transactions with the exception of unrealised losses arising on the remeasurement to fair value of equity securities classified as available-for-sale securities.
- Tier 2 capital, comprising qualifying subordinated term finance, collective impairment provisions and 45 per cent of unrealised gains arising on the remeasurement to fair value of equity securities classified as available-for-sale securities.

The CBB applies various limits to elements of the capital base. The amount of innovative tier 1 securities cannot exceed 15 per cent of total tier 1 capital; qualifying tier 2 capital cannot exceed tier 1 capital; and qualifying subordinated term finance cannot exceed 50 per cent of tier 1 capital. There are also restrictions on the amount of collective impairment provisions that may be included as part of tier 2 capital. Collective impairment provisions cannot exceed 1.25 per cent of total risk-weighted assets.

The Group's risk exposures are categorised as either trading book or banking book, and risk-weighted assets are determined according to specified requirements that seek to reflect the varying levels of risk attached to assets and off-balance sheet exposures.

The Group's policy is to maintain a strong capital base so as to maintain investor, creditor and market confidence and to sustain the future development of the business. The impact of the level of capital on shareholders' return is also recognised as well as the need to maintain a balance between the higher returns that might be possible with greater gearing and the advantages and security afforded by a sound capital position. The Group manages its capital structure and makes adjustments to the structure taking account of changes in economic conditions and strategic business plans. The capital structure may be adjusted through the dividend payout, the issue of new shares and through subordinated term finance arrangements.

The Group and its individually regulated operations complied with all externally imposed capital requirements throughout the years ended 31st December 2010 and 31st December 2009.

There have been no material changes in the Group's management of capital during the years ended 31st December 2010 and 31st December 2009.

The capital adequacy ratio calculation is set out in note 33.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

for the year ended 31st December 2010

27. GEOGRAPHICAL DISTRIBUTION OF RISK ASSETS

31.12.10

31.12.09

	Placements & other liquid assets US\$ millions	Securities US\$ millions	Loans and advances	Credit-related contingent items US\$ millions	Total US\$ millions	Total US\$ millions
GCC	1,264.7	1,506.7	7,140.9	1,677.4	11,589.7	13,511.9
Other Middle East & North Africa	-	45.4	197.3	62.8	305.5	452.8
Europe	2,849.3	718.1	167.0	205.8	3,940.2	2,571.1
North America	24.2	598.9	0.2	183.9	807.2	1,299.5
Asia	482.0	249.5	4.7	20.0	756.2	300.8

	4,620.2	3,147.5	7,510.1	2,149.9	17,427.7	18,136.1

At 31st December 2010, risk exposures to customers and counterparties in the GCC represented 66.5 per cent (2009: 74.5 per cent) of total risk assets. The risk asset profile reflects the Group's strategic focus on merchant banking activities in the GCC states.

An analysis of derivative and foreign exchange instruments is set out in note 30.

28. MATURITIES OF ASSETS AND LIABILITIES

The maturity profile of the carrying amount of assets and liabilities, based on the contractual maturity dates, was as follows:-

	Within	4 months	Years	Years	Over 5 years	
	3 months US\$ millions	to 1 year US\$ millions	2 and 3 US\$ millions	4 and 5	and other	Total
At 31st December 2010	OS\$ millions	US\$ millions	US\$ millions	US\$ millions	US\$ millions	US\$ millions

•					the state of the s	

The asset and liability maturities presented in the table above are based on contractual repayment arrangements and as such do not take account of the effective maturities of deposits as indicated by the Group's deposit retention records. Formal liquidity controls are nevertheless based on contractual asset and liability maturities.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

for the year ended 31st December 2010

28. MATURITIES OF ASSETS AND LIABILITIES (continued)

The gross cash flows payable by the Group under financial liabilities, based on contractual maturity dates, was as follows:-

	Within 3 months	4 months to 1 year	Years 2 and 3	Years 4 and 5	Over 5 years
	US\$ millions	US\$ millions	US\$ millions	US\$ millions	US\$ millions
At 31st December 2010					
Deposits	6,728.0	1,994.9	9.6	-	-
Securities sold under agreements to repurchase	779.1	169.4	_	-	-
Term financing	2.1	401.5	1,991.2	1,401.9	157.0
Derivative financial instruments:					
- contractual amounts payable	35.4	94.8	203.8	169.1	112.8
- contractual amounts receivable	(15.1)	(63.3)	(167.9)	(142.9)	(100.9)
Total undiscounted financial liabilities	7,529.5	2,597.3	2,036.7	1,428.1	168.9
At 31st December 2009					
Deposits	8,854.1	1,236.2	9.2	-	-
Securities sold under agreements to repurchase	573.5	-	-	-	-
Term financing	21.6	886.3	2,256.0	55.0	544.7
Derivative financial instruments:					
- contractual amounts payable	66.1	88.4	189.5	145.6	210.4
- contractual amounts receivable	(10.5)	(57.6)	(167.9)	(146.8)	(212.8)
Total undiscounted financial liabilities	9,504.8	2,153.3	2,286.8	53.8	542.3

Information on the contractual terms for the drawdown of gross loan commitments is set out in note 31.

The figures in the table above do not agree directly to the carrying amounts in the consolidated statement of financial position as they incorporate all cash flows, on an undiscounted basis, related to both principal as well as those associated with future coupon and interest payments. Coupons and interest payments for periods for which the interest rate has not yet been determined have been calculated based on the relevant forward rates of interest prevailing at the balance sheet

A maturity analysis of derivative and foreign exchange instruments based on notional amounts is set out in note 30(c).

29. INTEREST RATE RISK

The repricing profile of assets and liabilities categories were as follows:-

	Within 3 months	Months 4 to 6	Months 7 to 12	Over 1 year	Non-interest bearing items	Total
	US\$ millions	US\$ millions	US\$ millions	US\$ millions	US\$ millions	US\$ millions
At 31st December 2010

The repricing profile is based on the remaining period to the next interest repricing date. The repricing profile of placements incorporates the effect of interest rate swaps used to lock-in a return on the Group's net free capital funds. Derivative financial instruments that have been used for asset and liability management purposes to hedge exposure to interest rate risk are incorporated in the repricing profiles of the related hedged assets and liabilities. The non-specific loan provision is deducted from non-interest bearing assets.

The substantial majority of assets and liabilities reprice within one year. Accordingly there is limited exposure to interest rate risk. The principal interest rate risk beyond one year as set out in the asset and liability repricing profile, represents the investment of the Group's net free capital in fixed rate government securities. At 31st December 2010 the modified duration of these fixed rate securities was 2.44. Modified duration represents the approximate percentage change in the portfolio value resulting from a 100 basis point change in yield. More precisely in dollar terms, the price value of a basis point of the fixed rate securities was US\$197,000.

Based on the repricing profile at 31st December 2010, and assuming that the financial assets and liabilities were to remain until maturity or settlement with no action taken by the Group to alter the interest rate risk exposure, an immediate and sustained one per cent increase in interest rates across all maturities would result in a reduction in net income before tax for the following year and in the Group's equity by approximately US\$11.1 million and US\$32.2 million respectively (2009: US\$5.6 million and US\$10.9 million respectively). The impact on the Group's equity represents the cumulative effect of the increase in interest rates over the entire duration of the mismatches in the repricing profile of the interest rate sensitive financial assets and liabilities.

The Value-at-Risk by risk class for the Group's trading positions is set out in note 26. The market risk relating to foreign exchange and derivative trading instruments is set out in note 30.

30. DERIVATIVE AND FOREIGN EXCHANGE INSTRUMENTS

The Group utilises derivative and foreign exchange instruments to meet the needs of its customers, to generate trading revenues and as part of its asset and liability management (ALM) activity to hedge its own exposure to market risk. Derivative instruments are contracts whose value is derived from one or more financial instruments or indices. They include futures, forwards, swaps and options in the interest rate, foreign exchange, equity, credit and commodity markets. Derivatives and foreign exchange are subject to the same types of credit and market risk as other financial instruments. The Group has appropriate and comprehensive Board-approved policies and procedures for the control of exposure to both market and credit risk from its derivative and foreign exchange activities.

In the case of derivative transactions, the notional principal typically does not change hands. It is simply a quantity which is used to calculate payments. While notional principal is a volume measure used in the derivative and foreign exchange markets, it is neither a measure of market nor credit risk. The Group's measure of credit exposure is the cost of replacing contracts at current market rates should the counterparty default prior to the settlement date. Credit risk amounts represent the gross unrealised gains on non-margined transactions before taking account of any collateral held or any master netting agreements in place.

The Group participates in both exchange traded and over-the-counter (OTC) derivative markets. Exchange traded instruments are executed through a recognised exchange as standardised contracts and primarily comprise futures and options. OTC contracts are executed between two counterparties who negotiate specific agreement terms, including the underlying instrument, notional amount, maturity and, where appropriate, exercise price. In general, the terms and conditions of these transactions are tailored to the requirements of the Group's customers although conform to normal market practice. Industry standard documentation is used, most commonly in the form of a master agreement. The existence of a master netting agreement is intended to provide protection to the Group in the event of a counterparty default.

The Group's principal foreign exchange transactions are forward foreign exchange contracts, currency swaps and currency options. Forward foreign exchange contracts are agreements to buy or sell a specified quantity of foreign exchange on a specific future date at an agreed rate. A currency swap involves the exchange, or notional exchange, of equivalent amounts of two currencies and a commitment to exchange interest periodically until the principal amounts are re-exchanged on a specified future date. Currency options provide the buyer with the right, but not the obligation, either to purchase or sell a fixed amount of a currency at a specified exchange rate on or before a specified future date. As compensation for assuming the option risk, the option seller (or writer) receives a premium at the start of the option period.

The Group's principal interest rate-related derivative transactions are interest rate swaps, forward rate agreements, futures and options. An interest rate swap is an agreement between two parties to exchange fixed rate and floating rate interest by means of periodic payments based upon a notional principal amount and the interest rates defined in the contract. Certain agreements combine interest rate and foreign currency swap transactions, which may or may not include the exchange of principal amounts. In a forward rate agreement, two parties agree a future settlement of the difference between an agreed rate and a future interest rate, applied to a notional principal amount for an agreed period. The settlement, which generally occurs at the start of the contract period, is the discounted present value of the payment that would otherwise be made at the end of that period. An interest rate future is an exchange traded contract for the delivery of a standardised amount of a fixed income security or time deposit at a future specified date. Interest rate options, including caps, floors and collars, provide the buyer with the right, but not the obligation, either to purchase or sell an interest rate financial instrument at a specified price or rate on or before a specified future

The Group's principal equity-related derivative transactions are equity and stock index options. An equity option provides the buyer with the right, but not the obligation, either to purchase or sell a specified stock or index at a specified price or level on or before a specified future date.

The Group buys and sells credit protection through credit default swaps. Credit default swaps provide protection against the decline in value of a referenced asset as a result of credit events such as default or bankruptcy. It is similar in structure to an option whereby the purchaser pays a premium to the seller of the credit default swap in return for payment related to the deterioration in value of the referenced asset. Credit default swaps purchased and sold by the Group are classified as derivative financial instruments

30. <u>DERIVATIVE AND FOREIGN EXCHANGE INSTRUMENTS</u> (continued)

a) Product analysis

The table below summarises the aggregate notional and credit risk amounts of foreign exchange, interest rate, credit and equity-related derivative contracts.

	Notional amounts			Credit risk
	Trading	Hedging	Total	amounts
	US\$ millions	US\$ millions	US\$ millions	US\$ millions
At 31st December 2010				
Foreign exchange contracts:-				
Unmatured spot, forward and futures contracts	397.9	2,095.1	2,493.0	11.9
Interest rate contracts:-				
Interest rate swaps	1,937.8	5,073.1	7,010.9	89.9
Cross currency swaps	-	400.0	400.0	-
Options, caps and floors purchased	24.3	-	24.3	0.2
Options, caps and floors written	24.3	•	24.3	-
	1,986.4	5,473.1	7,459.5	90.1
Credit contracts:-	-			THE COURT OF STATE OF
Protection sold	25.0	-	25.0	-
Total	2,409.3	7,568.2	9,977.5	102.0
At 31st December 2009				
Total	3,012.2	4,204.0	7,216.2	78.5

There is no credit risk in respect of options, caps and floors written, and protection sold on credit contracts as they represent obligations of the Group.

At 31st December 2010 the Value-at-Risk of the foreign exchange, interest rate and credit derivative trading contracts analysed in the table above, as calculated in accordance with the basis set out in note 33, was U\$\$0.1 million, U\$\$0.1 million and nil respectively (2009: nil, U\$\$0.1 million and nil). Value-at-Risk is a measure of market risk exposure and is accordingly separate and in addition to the credit risk exposure represented by the credit risk amounts in the table above.

b) Counterparty analysis

		31.12.10		31.12.09
Credit risk amounts	Banks	Corporates	Total	Total
	US\$ millions	US\$ millions	US\$ millions	US\$ millions
OECD countries	34.6	-	34.6	18.9
GCC countries	0.3	54.0	54.3	49.6
Other countries	-	13.1	13.1	10.0
	34.9	67.1	102.0	78.5

Credit risk is concentrated on major OECD-based banks and GCC-related customers.

30. DERIVATIVE AND FOREIGN EXCHANGE INSTRUMENTS (continued)

c) Maturity analysis

y matarity analysis		Years	Years	Over	
	Year 1	2 & 3	4 & 5	5 years	Total
	US\$ millions				
At 31st December 2010					
Foreign exchange contracts	2,493.0	-	-	-	2,493.0
Interest rate contracts	4,218.0	956.7	1,140.6	1,144.2	7,459.5
Credit contracts	-	25.0	-	-	25.0
Total	6,711.0	981.7	1,140.6	1,144.2	9,977.5
At 31st December 2009					
Total	4,135.0	1,424.1	368.1	1,289.0	7,216.2

The Group's derivative and foreign exchange activities are predominantly short-term in nature. Transactions with maturities over one year principally represent either fully offset trading transactions or transactions that are designated, and qualify, as fair value and cash flow hedges.

d) Fair value analysis

	31.12	.10	31.12	.09
	Positive	Negative	Positive	Negative
	fair value	fair value	fair value	fair value
	US\$ millions	US\$ millions	US\$ millions	US\$ millions
Derivatives held for trading:-				
Forward foreign exchange contracts	2.2	(2.1)	2.2	(44.7)
Interest rate swaps and swaptions	64.9	(61.4)	58.3	(53.7)
	67.1	(63.5)	60.5	(98.4)
Derivatives held as cash flow hedges:-		_		
Forward foreign exchange contracts	-	-	0.1	-
Derivatives held as fair value hedges:-				
Interest rate swaps	-	(22.7)	-	(39.1)
Amount included in other assets / (other liabilities)	67.1	(86.2)	60.6	(137.5)

e) Significant net open positions

There were no significant derivative trading or foreign currency net open positions at either 31st December 2010 or at 31st December 2009.

30. DERIVATIVE AND FOREIGN EXCHANGE INSTRUMENTS (continued)

f) Hedge effectiveness

Gains and losses recognised in the consolidated statement of income relating to fair value hedging relationships were as follows:-

	2010	2009
	US\$ millions	US\$ millions
Net gains on derivative fair value hedging instruments	28.9	27.4
Net losses on hedged items attributable to the hedged risk	28.9	27.4

There were no ineffective portions of derivative fair value or cash flow hedging transactions recognised in the consolidated statement of income in either the year ended 31st December 2010 or 31st December 2009.

Certain derivative cash flow hedging transactions were unwound during the year ended 31st December 2009. The resultant realised profits are being recognised in the consolidated statement of income over the respective tenors of the original transactions for periods to 2014.

31. CREDIT-RELATED FINANCIAL INSTRUMENTS

Credit-related financial instruments include commitments to extend credit, standby letters of credit and guarantees which are designed to meet the financing requirements of customers. The credit risk on these transactions is generally less than the contractual amount. The table below sets out the notional principal amounts of outstanding credit-related contingent items and the risk-weighted exposures calculated in accordance with the capital adequacy guidelines of the Basel Committee on Banking Supervision.

	<u>31.12.10</u>		31.12.09	
	Notional	Risk-	Notional	Risk-
	principal	weighted	principal	weighted
	amount	exposure	amount	exposure
	US\$ millions	US\$ millions	US\$ millions	US\$ millions
Direct credit substitutes	164.0	147.6	171.6	161.4
Transaction-related contingent items	1,237.2	474.3	808.7	322.4
Short-term self-liquidating trade-related contingent items	209.2	42.9	234.3	48.3
Commitments, including undrawn loan commitments and underwriting commitments under note issuance and				
revolving facilities	539.5	224.8	945.8	450.2
	2,149.9	889.6	2,160.4	982.3

Commitments may be drawndown on demand.

Direct credit substitutes at 31st December 2010 included financial guarantees amounting to US\$101.8 million (2009: US\$138.5 million). Financial guarantees may be called on demand.

Credit-related financial instruments are reported gross before applying credit risk mitigants, such as cash collateral, guarantees and counter-indemnities. At 31st December 2010 the Group held cash collateral, guarantees, counter-indemnities or other high quality collateral in relation to credit-related financial instruments amounting to US\$178.7 million (2009: US\$115.1 million).

32. CONTINGENT LIABILITIES

Litigation

The Bank and its subsidiaries are engaged in litigation in various jurisdictions. The litigation involves claims by and against Group companies which have arisen in the ordinary course of business. The directors of the Bank, after reviewing the claims pending against Group companies and based on the advice of relevant professional legal advisors, are satisfied that the outcome of these claims will not have a material adverse effect on the financial position of the Group.

33. CAPITAL ADEQUACY

The CBB's Basel 2 guidelines became effective on 1st January 2008 as the common framework for the implementation of the Basel Committee on Banking Supervision's (Basel Committee) Basel 2 capital adequacy framework for banks incorporated in the Kingdom of Bahrain.

The risk asset ratio calculated in accordance with the CBB's Basel 2 guidelines was as follows:-

Regulatory capital base Tier I capital: 1,918.0 1,779.4 Adjustment to exclude net fair value losses 1,930.0 1,832.8 Tier I capital: 438.8 53.1 Tier I capital: 438.8 51.10 Subordinated term financing 438.8 51.10 Non-specific provisions subject to 1.25% risk weighted exposure limitation 129.0 139.4 Tier 2 capital: 2,508.8 656.1 Tier 2 capital for visions subject to 1.25% risk weighted exposure limitation 11.0 5.7 Tier 2 capital for visions subject to 1.25% risk weighted exposure 2,508.8 666.1 Tier 2 capital for visions subject to 1.25% risk weighted exposure 2,508.8 8.0 2,488.9 Risk-weighted exposure 8.8 8.8 8.666.1 1.0 5.7 Tier 2 capital for visions subject to 1.25% risk weighted exposure 9.8 8.8 6.666.1 1.0 6.666.1 1.0 1.0 2.488.9 8.666.1 1.0 1.0 1.0 1.0 1.0 1.0 1.0 1.0 1.0 1.0 1.0 <th></th> <th></th> <th>31.12.10 US\$ millions</th> <th></th> <th>31.12.09 US\$ millions</th>			31.12.10 US\$ millions		31.12.09 US\$ millions

33. CAPITAL ADEQUACY (continued)

For regulatory Basel 2 purposes, the Group has initially adopted the standardised approach for credit risk. In time and subject to approval by the CBB, the Group plans to adopt the foundation internal ratings-based (FIRB) approach for credit risk as it is more closely aligned to the Group's internal risk and capital management methodologies. For market risk, the Group uses the internal models approach. GIB has initially adopted the basic indicator approach for determining the capital requirement for operational risk, although is planning to adopt the standardised approach for operational risk subject to approval by the CBB.

In accordance with the capital adequacy guidelines of the CBB, revaluation gains and losses arising on the remeasurement to fair value of available-for-sale securities and derivative cash flow hedging transactions are excluded from tier 1 capital with the exception of losses arising on the remeasurement to fair value of equity securities classified as available-for-sale. In accordance with the CBB's guidelines, gains arising on the remeasurement to fair value of equity securities classified as available-for-sale are included in tier 2 capital, although limited to 45 per cent of the unrealised revaluation gain.

The Group's subordinated term financing facilities have been approved for inclusion in tier 2 capital by the CBB. During the last five years before maturity, a cumulative amortisation (discount) factor of 20 per cent per year is to be applied to the facilities. As at 31st December 2010, the amortisation amount excluded from tier 2 capital amounted to US\$72.2 million (2009: nil).

The Group calculates the regulatory capital requirement for general market risk using a Value-at-Risk model. The use of the internal model approach for the calculation of the capital requirement for general market risk has been approved by the Bank's regulator, the CBB. The multiplication factor to be applied to the Value-at-Risk calculated by the internal model has been set at 3.5 (2009: 3.5) by the CBB.

Value-at-Risk is calculated based on a 99 per cent confidence level, a ten-day holding period and a twelve-month historical observation period of unweighted data from the DataMetrics regulatory data set. Correlations across broad risk categories are excluded. Prescribed additions in respect of specific risk are made to the general market risk. The resultant measure of market risk is multiplied by 12.5, the reciprocal of the 8 per cent international minimum capital ratio, to give market risk-weighted exposure on a basis consistent with credit risk-weighted exposure.

The Group calculates the regulatory capital requirement for operational risk by applying an alpha co-efficient of 15 per cent to the average gross income for the preceding three financial years.

34. FIDUCIARY ACTIVITIES

The Group conducts investment management and other fiduciary activities on behalf of clients. Assets held in trust or in a fiduciary capacity are not assets of the Group and accordingly have not been included in the consolidated financial statements. The aggregate amount of the funds concerned at 31st December 2010 was US\$18,206.5 million (2009: US\$16,638.7 million).

35. RELATED PARTY TRANSACTIONS

The Group's related party transactions are limited to the compensation of its directors and executive officers.

The compensation of key management personnel was as follows:-

	2010	2009
	US\$ millions	US\$ millions
Short term employee benefits	5.4	5.9
Post-employment benefits	0.4	0.5
	5.8	6.4
		CONTRACTOR OF THE PROPERTY OF THE PARTY OF T

Key management personnel comprise members of the Board of Directors, the Group Chief Executive Officer and the Managing Directors of the Group.

Post-employment benefits principally comprise compensation paid to personnel on retirement or resignation from the services of the Group.

There were no other related party transactions.

36. FAIR VALUE OF FINANCIAL INSTRUMENTS

The Group's financial instruments are accounted for under the historical cost method with the exception of trading securities, available-for-sale securities and derivative financial instruments. By contrast the fair value represents the amount at which an asset could be exchanged, or a liability settled, in a transaction between knowledgeable, willing parties in an arm's length transaction. Differences therefore can arise between book values under the historical cost method and fair value estimates. Underlying the definition of fair value is the presumption that the Group is a going concern without any intention or requirement to curtail materially the scale of its operation or to undertake a transaction on adverse terms. Generally accepted methods of determining fair value include reference to quoted prices or to the pricing prevailing for similar financial instruments and the use of estimation techniques such as discounted cash flow analysis.

Based on the valuation methodologies outlined below, the fair values of all on- and off-balance sheet financial instruments were not significantly different to their carrying amounts.

a) Trading and investment securities

The fair values of securities are based on quoted prices or valuation techniques with the exception of investments in unquoted equity investments for which fair values cannot be reliably measured, the fair values of which are based on their carrying

b) Loans and advances

The fair values of loans held for trading are based on quoted market prices. The fair values of other loans on a floating interest rate basis are principally estimated at book value less provisions for impairment. The fair values of troubled sovereign debt are based on market bid prices. The fair values of impaired loans are estimated at the recoverable amount, measured as the present value of expected future cash flows discounted based on the interest rate at the inception of the loan. The fair values of fixed rate loans are estimated on a discounted cash flow basis utilising discount rates equal to prevailing market rates of interest in the respective currencies for loans of similar residual maturity and credit quality.

c) Term financing

The fair value of term financing is based on observable market data, including quoted market prices for debt instruments issued by similarly rated financial institutions and with similar maturities, or estimated on a discounted cash flow basis utilising currently prevailing spreads for borrowings with similar maturities. The fair values of senior term financing and subordinated term financing at 31st December 2010 were US\$3,163.1 million and US\$446.6 million respectively (2009: US\$2,958.2 million and US\$461.7 million respectively).

d) Other on-balance sheet items

The fair values of foreign exchange and derivative financial instruments are based on market prices, discounted cash flow techniques or option pricing models as appropriate. The fair values of all other on-balance sheet financial assets and liabilities approximate their respective book values due to their short term nature.

e) Credit-related contingent items

There was no material fair value excess or shortfall in respect of credit-related off-balance sheet financial instruments, which include commitments to extend credit, standby letters of credit and guarantees, as the related future income streams reflected contractual fees and commissions actually charged at the balance sheet date for agreements of similar credit standing and maturity. Specific provisions made in respect of individual transactions where a potential for loss has been identified are included in provisions for the impairment of loans and advances.

The valuation basis for financial assets and financial liabilities carried at fair value was as follows:-

		Valuation	
•		based on	Other
	Quoted	observable	valuation
	prices	market data	techniques
	(level 1)	(level 2)	(level 3)
At 31st December 2010	US\$ millions	US\$ millions	US\$ millions
Financial assets:			
Trading securities	79.7	-	-
Investment securities	2,933.8	•	27.1
Derivative financial instruments	-	67.1	-
Financial liabilities:			
Derivative financial instruments	-	86.2	-
At 31st December 2009			
Financial assets:			
Trading securities	50.2	-	-
Investment securities	1,868.0	-	24.9
Derivative financial instruments	-	60.6	-
Financial liabilities:			
Derivative financial instruments	-	137.5	-

Quoted prices include prices obtained from lead managers, brokers and dealers. Investment securities valued based on other valuation techniques comprise private equity investments that have been valued based on price / earnings ratios for similar entities. The majority of the Group's financial assets and liabilities that are carried at fair value are valued based on quoted market prices. At 31st December 2010, 97.0 per cent of financial assets carried at fair value were valued based on quoted prices (2009: 95.7 per cent).

36. FAIR VALUE OF FINANCIAL INSTRUMENTS (continued)

During the year ended 31st December 2010, the value of investment securities whose measurement was determined by other valuation techniques (level 3 measurement) increased by US\$2.2 million. The increase entirely comprised changes in assigned valuations, as recognised in other comprehensive income. No transfers out of, or into, the level 3 measurement classification occurred during the year ended 31st December 2010.

37. EARNINGS PER SHARE

Basic earnings per share is calculated by dividing the net income / (loss) attributable to the shareholders by the weighted average number of shares in issue during the year.

	2010	2009
Net income / (loss) after tax (US\$ millions)	100.4	(152.6)
Weighted average number of shares in issue (millions)	2,500	2,500
Basic earnings per share	US\$0.04	(US\$0.06)

The diluted earnings per share is equivalent to the basic earnings per share set out above.

38. PRINCIPAL SUBSIDIARIES

The principal subsidiary companies were as follows:-

	Country of	Ownership interest	
	incorporation	31.12.10	31.12.09
Gulf International Bank (UK) Limited	United Kingdom	100%	100%
GIB Financial Services L.L.C.	Kingdom of Saudi Arabia	100%	100%
GIB Investment S.P.C.	Kingdom of Bahrain	100%	100%

39. AVERAGE CONSOLIDATED STATEMENT OF FINANCIAL POSITION

The average consolidated statement of financial position was as follows:-

_	31.12.10	31.12.09
	US\$ millions	US\$ millions
Assets		
Cash and other liquid assets	787.2	265.3
Placements	4,206.3	4,481.9
Due from shareholders	-	1,148.2

Subordinated term financing	511.0	533.9
Total liabilities	14,184.1	17,643.4
Total equity	1,884.2	1,939.4
Total liabilities & equity	16,068.3	19,582.8

40. PARENT COMPANY

The condensed unconsolidated financial statements of Gulf International Bank B.S.C. were as follows:-

a) Condensed statement of financial position

a, <u>santanta datamenta podas.</u>	31.12.10 US\$ millions	31.12.09 US\$ millions
Assets		
Cash and other liquid assets	120.9	197.0
Placements	2,448.0	2,258.9
Trading securities	56.0	47.9
Investment securities	3,067.8	2,017.7
Investments in subsidiaries	243.5	235.7
Loans and advances	7,510.0	9,307.4
Other assets	215.2	195.4
Total assets	13,661.4	14,260.0
Liabilities		
Deposits from banks	2,067.0	2,326.0
Deposits from customers	4,579.4	5,557.4
Securities sold under agreements to repurchase	1,145.8	790.0
Other liabilities	262.8	288.3
Senior term financing	3,176.6	3,007.9
Subordinated term financing	511.0	511.0
Total liabilities	11,742.6	12,480.6
Total equity	1,918.8	1,779.4
Total liabilities & equity	13,661.4	14,260.0

The investments in subsidiaries are accounted for at fair value. Gains and losses arising from changes in the fair values of the investments are accounted for in equity.

b) Condensed statement of income
